E.U. Agricultural Wine dashboard - Metadata Information

Slide number	1
Slide name	Intro – Overview
Data Source	Member state info, multiple publications
Concept and Definition	This slide aims to give an overview of the Market situation in the wine sector of the European Union
Unit of Measurement	1000 Hectoliters, Mio euros, hectogrades, hectare
Coverage	1980 – present
Contact point	Agri-G2@Ec.Europa.EU
External links	http://ec.europa.eu/agriculture/wine/statistics_en
Additional note	
Update Frequency	6 times / year

E.U. Agricultural Wine dashboard - Metadata Information

Slide number	9 to 13
Slide name	EU-28 Wine Must Production (1000 HI)
Data Source	Reg. (EU) 2009/436, Art. 19 §1a,b Reg. (EU) 2017/1185, Art. 6
Concept and Definition	This slide aims to show the evolution of the total wine must produced in the European Union during 1 wine year (Aug-July)
Unit of Measurement	1000 Hectoliters
Coverage	2003-04 to present
Contact point	Agri-G2@Ec.Europa.EU
External links	http://ec.europa.eu/agriculture/wine/statistics_en
Additional note	ISAMM Forms 58 (forecast) & 78 (Prod declarations)
Update Frequency	2 times/year: Provisional forecast data at the start of the wine year, final production data during the year.

E.U. Agricultural Wine dashboard - Metadata Information

Slide number	24 - 33
Slide name	EU-28 Trade Data (in Volume and in Value)
Data Source	Eurostat- Comext EU since 19999 CN Dataset, Information on extra-EU trade is collected by the Member States from the statistical copy of the customs declaration (SAD). Information on intra-EU trade is collected by the Member States using the various media placed at the disposal of the information providers. These may be paper or electronic declarations provided for at national level.
Concept and Definition	This slide aims to show the evolution of the total wine imports and exports in the European Union during 1 calendar year (January - December)
Unit of Measurement	Hectoliters and Euro
Coverage	2008 to present
Contact point	Agri-G2@Ec.Europa.EU

April 2018 Wine Market Update

Production:

Official declarations on 2017 wine production received add up to a volume of 133 Mio hectolitres (15% below the 5-year average), confirming previous extreme low forecast figures.

The current situation with high price levels (Basic red wines in Italy +75% compared to 2017) despite the existence of important stocks remains difficult to analyse, taken in account geopolitical instability on main export markets and shrinking local consumption.

March 2018 Wine Market Update

- **Prices** for basic wines remain at high level in Italy and Spain
compared to 2017: Italy +74%, Spain +45%

- **2017 Trade figures:**

2017 Exports reached 24,9 Mio Hectolitres (+11% vs 2016)

2017 Imports remained stable 13,8 Mio HI (-3% vs 2016)

**Trade Balance increased by
from €7,5 Billion to €8,7 Billion (+16%)**

June 2018 Wine Market Update

Production:

2017 [grape must production](#) slightly revised upwards to 143.8 Mio hectolitres, [wine production forecast](#) remains at a volume of 133 Mio hectolitres (15% below the 5-year average).

High price level for basic red wines compared to 2017 remain in Italy +70% and Spain +40%, even in France +27%.

Geopolitical instability on main export markets.

Favourable weather and phytosanitary conditions up to now lead to 2018 harvest predictions slightly above average.

October 2018 Wine Market Update

Production:

Favourable weather and phytosanitary conditions leads 2018 harvest predictions slightly above 5-year average (+5%).

2018 [grape must production](#) slightly revised upwards to 175.6 Mio hectolitres, [wine production forecast](#) at a volume of 169 Mio hectolitres (5% above 5-year average).

High price level of 2017 basic red wines remains

Geopolitical instability on main export markets.

November 2018 Wine Market Update

Favourable weather and phytosanitary conditions leads 2018 grape must production forecasts at 175.6 Mio hectolitres, wine production at 169 Mio hectolitres (5% above 5-year avg).

2018 campaign starts with low Stock level, -9,9% to previous campaign, due to low harvest last year and stable trade.

High price level of 2017 basic red wines starts decreasing in Italy (-23% to last year). Still high price levels.

Geopolitical instability on main export markets remains.

January 2019 Wine Market Update

2018 grape must production forecasts increased up to 179,3 Mio hectolitres, wine production at 173,4 Mio hectolitres (7,3% above 5-year avg), as Production declarations are advancing.

2018 Campaign started with low Stock level, -9,9% to previous campaign, due to low harvest last year and stable trade. Current campaign will see stocks increase by 8.5 Mio hl but total level (163 Mio Hl) expected to remain below 2017 level (171 Mio hl).

Price level of basic red wines stabilizes in Italy after decrease (-31% to last year), still decreasing in Spain (-10%). However price level remains high compared to 3-year average (IT +13% / ES +29%).

Geopolitical instability on main export markets remains.

February 2019 Wine Market Update

High fluctuations in EU wine production: after very poor harvest last year a bumper harvest may be expected this year. Upwards revised harvest figures by France make EU wine most production boost up to 182.7 million Hectolitres, 9.4% above the 5-year average and the highest result since 2006 harvest.

Stocks are expected to increase by 8.3 Mio hl only and will remain in general below average stock level following the drop in stocks resulting from last year's poor harvest.

Price level of basic red wines stabilizes in Italy after decrease (-31% to last year), still decreasing in Spain (-10%). However price level remains high compared to 3-year average (IT +13% / ES +29%).

Geopolitical instability on main export markets remains.

March 2019 Wine Market Update

Final production declarations confirm the expected increase. During the 2018-2019 campaign 190 mio Hl of grape must will have been produced of which 183 mio Hl will have been vinified. The current harvest is situated 14% above the 5-year average and 32% above the poor 2017-18 harvest. Compared to 5-year average only Portugal (-6%), Bulgaria (-15%) and Greece (-18%) have suffered from bad weather conditions.

With constant consumption figures and stable trade, stocks are expected to increase by the end of this campaign by 15 mio hectolitres (+10%), back to the acceptable level of 2016-2017 (170 Mio hectolitres).

June 2019 Wine Market Update

2018 Wine harvest was characterised by a bumper harvest (14% above the 5-year average and 32% above the 2017 harvest) and decreasing prices in most wine segments.

The 2019 wine year will start with an appropriate stock level and price levels close to the 3-year average, in some cases however slightly below. Market operators are waiting for the first reliable harvest estimations.

Even though 85% of all wines produced within the European Union are consumed or processed inside the Union, tensions due to uncertainty remain concerning some major destination markets.

July 2019 Wine Market Update

2018 Wine harvest was characterised by a bumper harvest (14% above the 5-year average and 32% above the 2017 harvest) and decreasing prices in most wine segments.

A new online Wine trade application is now available at <https://agridata.ec.europa.eu/extensions/DashboardWine/WineTrade.html>
